TO : **OPERATIONS**
FROM : **FINANCE DEPARTMENT/COST ACCOUNTING SECTION**
SUBJECT : **STORE APPLICATION GUIDELINES**
DATE : **March 1, 2023**

This is to formally inform you that all branches who's using the store application for two months except for Bajada, Gensan and Polomolok branches will no longer allowed to use the Inventory Form effective March 6, 2023 and will be forwarded to Inventory Analyst for the short/over monitoring.

Here are the list of attachments need to submit to the Inventory Department:

- FGTS
- B.O FORM
- INTERBRANCH SLIP
- CHARGE SLIP
- PHYSICAL COUNT SHEET
- PRODUCTION REPORT (CARBON COPY)
- DAILY SALES COLLECTION REPORT (CARBON COPY)
- DELIVERY RECEIPT FOR FINISH GOODS (DR) & OTHERS (INVOICES OR DR)
- PULL-OUT FORM

Here are the guidelines of each modules in using the Store Application for finish goods inventory.

Inventory Report

1. **Finish Goods Transfer** - all the breads in the FGTS produced by using the raw materials of branch should be encoded in this module including the FGTS of those branches like Cabantian and Ilang that has a production of frozen dough on their own. Make sure that all fields in this module are filled in correctly, if there are changes on the entry and the transactions are not yet close, double click the item below and correct the data then click "update", for another entry click "new". If all the entries are correct and verified click "Closed FGTS Report" and "post to summary".
2. **Transfer In/Out** – all the interbranch transactions should be encoded in this module, for the meantime the frozen dough transfers are not allowed to be entry in this module only finish goods and others. If the transfers are made by branches that used store application, the receiving branch will wait for the releasing branch to entry the transfer in the system because it will automatically posted in the receiving branch once the releasing branch entry the transfer in the system. If the transfer are made by branch that use store application and the other branch still using the manual system, the branch that use the store application will manually make the entry in the system whether transfer in or out.
3. **Charges, Snacks, Bad Order, Damage, and Complimentary** – make sure all the transactions in these modules are encoded correctly and completely, the entries will not save by the system if there are lacking data.
4. **Receiving Report** – all the deliveries should be entry in this module, if the items are delivered by warehouse, baking center or direct by supplier the supplier name in the module should be fall to warehouse unless the deliveries are made by the baking center. In terms of unit of measure the branch should use kilograms or pcs.
5. **Frozen Dough** – all the breads in the FGTS of frozen dough delivered by Bajada Frozen Dough Commissary should be encoded in this module, it will not reflect in the "prod in" in the summary or even in the production report since it does not use the raw materials of the branch. For the meantime, the manual frozen dough inventory report will still continue to use by those branches provided by the Commissary. The forms will still be provided by the Inventory Analyst Supervisor.
6. **Physical Count** – the actual count of finish good and others should be entry in this module. ***Please take note that even the breads or items that has zero actual count, it should still encoded in the physical count because the posting of beginning inventory in the summary report is by posting the physical count.***
7. **Cash Count** – the cash denominations should be reflected in this module. Make sure to attach the carbon copy of the daily sales collection report in your inventory reports so that the analyst will validate the cash count. The amount encoded in this module will be posted in the summary report also if there will be variances such as shortage or overage of cash and it will not be offsetted within 24hrs the charge slip will be serve.
