Job Title: Warehouse Inventory Analyst	
Department: Warehouse Management Department	Division: Supply Chain Management
Reports to: Warehouse Management Head	Location: Indangan

Job Summary

The Warehouse Inventory Analyst is responsible for ensuring accurate inventory levels and timely inventory replenishment in a warehouse setting. The analyst will use data analysis to monitor inventory levels, forecast demand, and identify areas for improvement in the inventory management process. The analyst will work closely with other warehouse staff, procurement teams, and vendors to optimize inventory levels and ensure efficient operations.

Warehouse Inventory Analyst plays a crucial role in ensuring efficient warehouse operations by maintaining accurate inventory levels and optimizing inventory management processes. The analyst's ability to analyze data, identify trends, and make recommendations for process improvements is key to achieving success in this role.

Note: Any incident of unresolve inventory variances has a sanction based on the severity of the incident.
