1. PURPOSE

To establish general procedure for all products so as to achieve the expected output in terms of quality, safety and quantity.

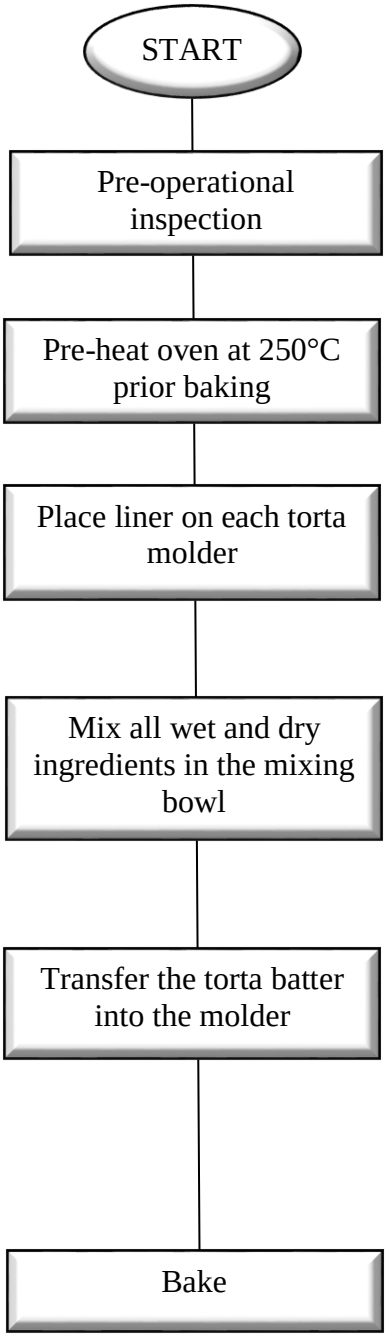
2. SCOPE

This procedure covers the activities of Production Department from preparation of raw materials to processing, finishing and loading of finished products for delivery of Jathnier Corporation.

3. DEFINITION OF TERMS

TERMS	-	DEFINITION
Batter	-	A semi-liquid mixture of flour, egg, and milk or water, used for making cakes and sponges.
FMDS	-	Formulation and Material Data Sheet
WIM	-	Work Instruction Manual
	-	
	-	
	-	

4. PROCEDURE DETAILS



Detailed Activity	Responsible	Documents
Pre-operational inspection on machines and materials shall be conducted prior to production.	Line Leader	Production Form
Pre-heat the oven adjusting the valve to 250°C both the upper and the lower deck.	Baker	Production Form
Liner on the molder serves as carrier of special torta. It also avoid the product from sticking on the molder during de-panning.	Baker	Production Form
Place all ingredients including torta premix in the mixing bowl and manually mix through rubber spatula. Then, mix at speed level 2 for 5 to 10 minutes until no lumps or solid formation is being observed.	Baker	Production Form
Torta batter is manually transferred into the molder (7 molders per baking pan). Tap the batter surface with X-shaped plastic dipped in vegetable oil to create crack on surface after baking.	Baker	Production Form
Bake the torta batter at 250°C for 5 minutes. The time is being set upon loading in the oven. Turn down the temperature and allow the torta to stand-by for another 5 minutes prior unloading.	Baker	Production Form

Continuation

	Detailed Activity	Responsible	Documents
Unload from the oven	Unload the torta after 5 minutes stand-by duration. Do not delay the unloading so that desired quality (height and color) will be achieved.	Baker	Production Form
Allow to cool down and endorse to Preparator	Allow the torta to cool down prior de-panning so as to maintain the shape and appearance prior endorsement to Preparator Area.	Baker	Production Form
	Random checking on quality is conducted. Issuance of non-conformance report shall be done on noted deviations.	QA/QC	QAD Form
De-pan and segregate	Proper handling of baked torta shall be followed so as to avoid any damages and contamination during Branch allocation. Expiration shall be indicated prior loading.	Preparator	Production Form
Load and deliver to Branches	Products shall be handled properly during loading into the truck.	Baker	Production Form
	Visual checking of delivery truck in terms of sanitation and temperature shall be conducted prior loading of products	QA/QC	QAD Form
