STOCKING REQUEST

Date July 22, 2025
To: Sir Mars Sanico / Property Custodian
From Operations and Cost & Inventory
Subject: COMPUTER PARTS STOCKING & CPU UNIT REQUEST

Dear Sir,

The operations team and Cost & Inventory has requested that we stock or reserve certain computer parts and units. This is to reduce the hassle of waiting for an extended period when purchasing these parts, which can sometimes take months. Without these essential components, branch operations may be disrupted due to non-functional computers. Therefore, I have listed the most commonly used computer parts below.

ACCESSORIES (Stored with Property Custodian)

DESCRIPTION	QTY
Keyboard	10
500/700 Watts Power Supply	5
Monitor	3
Power Cords	10
Box of UTP Cable 300 Meters	1

DESCRIPTION	QTY
Mouse	10
1 TB Hard drive	5
HDMI Cable	5
CPU Unit Only No Accessories	2
RJ 45 100pcs / Pack or Box	1

Parts like the motherboard, processor, and RAM don't need long-term storage, as they rarely fail and may corrode or get damaged over time. I've attached the CPU specs documents. The two CPUs are under the MIS-ICT/IT Department, and will serve as standby units for branches needing temporary replacements during repairs.
